

GIULIANOVA Lido (Te)

Its territory covers 27 square kilometers, including the natural boundaries formed by the Salinello River, to the north, and the Tordino, to the south. To the west it borders with the town of Mosciano Sant'Angelo, to the south with Roseto degli Abruzzi, to the north with Tortoreto and to the east by the Adriatic Sea.

The town is divided into two main areas welded together in recent decades: Giulianova properly speaking, also known as Giulianova Paese or Giulianova Alta, and Giulianova Lido or Giulianova Spiaggia (beach). The first includes the historic center and stretches up a hill of modest height (68 m. above sea level) about one kilometer from the coastline, while the Lido is made up of the most modern and touristic area, which developed during the twentieth century on the shores of the Adriatic.

Giulianova can also show off, in addition to its monumental Promenade, a traditional fishing port and tourist center, one of the four in Abruzzo, and in its oldest part, Giulianova Paese, some monuments of a certain historical and cultural significance such as the Renaissance Duomo San Flaviano, which with its huge dome dominates the city, the cinquecentesca Church of St. Anthony and that of Sant'Anna, the family chapel of the Bartolomei and the tower keep known as "the White", last remnant of the wall built in Middle Ages to defend the town.

Also in the immediate vicinity it offers the opportunity to enjoy the hilly landscape, amidst the warm colors of welcoming olive groves and vineyards, visiting medieval towns and villages, and discovering the art and folklore of this piece of Abruzzo.

Finally, in just over an hour to be at the foot of the Gran Sasso of Italy, in the Gran Sasso and Monti della Laga National Park, and in the six nature reserves, in a territory rich in ecosystems.
